PROFILE

Final-year BSCS student at Shah Abdul Latif University (4.00 GPA) specializing in LLM prompt engineering and API integration. Currently completing a dual-track internship at FlyRank spanning Machine Learning and AI Fluency. Built an AI-powered Disaster Warning System for Pakistan using LLaMA 3.1 via the Groq API, turning real-time hazard data into structured, actionable warnings for floods, earthquakes, landslides, and droughts.

EXPERIENCE

FlyRank — AI/ML Intern (Dual Track: ML + AI Fluency)

Jul 2026 – Present

- Contributing prompt engineering and LLM API integration for a capstone AI-Powered Disaster Warning System covering flood, earthquake, landslide, and drought alerts.
- Built baseline and modeling notebooks (rule-based scoring, Logistic Regression, Random Forest) using GroupShuffleSplit and Precision@50 as the evaluation metric.
- Designed and shipped a personal portfolio site (HTML/CSS, GitHub Pages) with HTTPS hosting and DNS documentation.

AI-Powered Disaster Warning System — Capstone Project

2026

- Integrated LLaMA 3.1-8b-instant via the Groq API to generate structured JSON hazard warnings (severity level, headline, message, recommended action, region, disaster type, risk score).
- Applied anti-fabrication constraints and prompt iteration to keep model outputs consistent and trustworthy.
- Collaborated with a teammate on a Python backend and HTML frontend for the end-to-end system.

SKILLS

- Prompt Engineering & LLM API Integration (Groq, LLaMA 3.1)
- Python, C++
- Data Analysis & scikit-learn (Logistic Regression, Random Forest)
- Git & GitHub, HTML/CSS
- MS Word, MS PowerPoint, Canva Design

EDUCATION

Shah Abdul Latif University, Khairpur

2023 – 2027

BS Computer Science — In Progress, GPA 4.00

Sajjad Model Higher Secondary School, Khairpur

2019 – 2021

LANGUAGES

English · Urdu · Sindhi

VOLUNTEER EXPERIENCE

- University Project Volunteer — collaborated with team members on academic projects and presentations.
